

SCHEDULE 2.

Description	Weight in oz.	Diameter of weight	Number required
<i>Weights.</i>			
1 Seer Measure	9.874	2.62	9,000
$\frac{1}{2}$ Do	4.937	2.37	9,000
$\frac{1}{4}$ Do	2.468	2.12	9,000
$\frac{1}{8}$ Do	1.234	1.62	9,000

DESCRIPTION OF WEIGHTS AND MEASURES.

Measures shall be hollow cylinders with plain bases and internal diameter equal to half the depth in the case of the full, half, quarter, measures and equal to $3/5$ depth in the case of $\frac{1}{8}$ and $\frac{1}{16}$ measures.

2. The measures shall be made of sheet iron $\frac{1}{32}$ inch thick and with brass bands brazed at the joints at the top and bottom of measures. The bottom of the measure should be flat and the joint should be well riveted and filed smoothly.

3. The brass bands should be of the following dimensions:

- For full seer measure, 1 inch width at the top and $\frac{3}{4}$ inch width at the bottom.
- For $\frac{1}{4}$ seer measure and $\frac{1}{2}$ seer measure, $\frac{3}{4}$ inch at top and $\frac{1}{2}$ inch at bottom.
- For $\frac{1}{8}$ seer measure $\frac{5}{8}$ inches width at the top only.
- For $\frac{1}{16}$ seer measure $\frac{1}{4}$ inch width at the top only.

4. The measures should be stamped with the Government crest which will be supplied.

5. Weights shall be made of cast iron which should be clean, sharp, sound and free from cracks, flaws, sand or air holes of any kind and should have their denomination as 1 seer, $\frac{1}{2}$ seer, etc., cast into it both in Kanarese and English, also the Government crest.

6. Samples of measures and weights required can be inspected at the office of the undersigned during office hours.

K. SRINIVASAIYENGAR,
Executive Engineer.

SANITARY DIVISION,

Dated 13th June 1912.

Notice is hereby given that sealed tenders will be received at the office of the Sanitary Engineer, Sanitary Division, up to 30th June 1912 for lowering and constructing V-shaped drains and constructing pipe sewers. An approximate estimate of quantities is given below. These quantities are not guaranteed. The work should be completed by the end of September 1912.

2. The plans, detailed estimate and conditions may be seen at the Sanitary Engineer's office at Bangalore between the hours of 12 A.M. and 5 P.M.

3. Tenders should be submitted on printed forms which may be obtained from the Executive Engineer. The tenders should be accompanied by a statement in the form given below, showing the rates at which the different items specified will be executed.

4. Each tender must be accompanied by a deposit of Rs. 100 in cash or Government Promissory Notes, as earnest money, and be superscribed "Tender for lowering and constructing V-shaped drains and pipe sewers," in default of which, tenders will be rejected.

5. The final acceptance of any tender will rest with the Superintending Engineer, who does not bind himself to accept the lowest or any tender or to assign any reason whatever for the rejection of any tender.

6. Within eight days of the acceptance of the tender, the successful competitor will be required to execute the usual contract bond; in default of which, his tender will be considered cancelled, and his earnest money will be forfeited.

7. The name of the successful competitor, whose tender has been accepted, will be posted on the notice board in the Sanitary Engineer's office in due course. No enquiries regarding the acceptance or rejection of a tender will receive any reply.

8. On acceptance of one of the tenders, the earnest money on rejected tenders will be returned.

Drainage work of old Taragupet, Bangalore City.

I. Lowering the storm water drain.

		Unit	Quantity
(a)	Dismantling stone in chunam ...	C. ft.	5,784
(b)	Removing and relaying covering slabs ...	S. ft.	5,730
(c)	Chunam pointing to covering slabs ...	Sq.	57'30
(d)	Burnt stone slabs 6" to cover man-holes ...	S. ft.	220
(e)	Cutting circular opening for fixing C. I. frames in the man-hole covering slabs ...	No.	11

II. Constructing V-shaped drains.

(a)	Constructing V-shaped drains with new stones from 3" to 6" with chunam pointing to slabs and with concrete below joints of slabs of V-shaped drain ...	R. ft.	1,320
(b)	Do with old slabs ...	R. ft	1,200

III. Silt traps.

(a)	Removing and relaying stone pavement
(b)	Earthwork, excavation ...	C. yd.	69
(c)	Concrete in surki mortar ...	C. ft.	331
(d)	Burnt brick in surki mortar ...	C. ft.	88
(e)	Plastering do ...	Sq.	487
(f)	Burnt stone slabs 6" including dressing and cutting grooves, etc. ...	S. ft.	74

IV. Constructing pipe sewers.

(a)	Earthwork, excavation	C. yd.	2,216
(b)	Laying and jointing pipes 7"	R. ft.	457
(c)	Do 9"	R. ft.	1,096
(d)	Earth filling	C. yd.	2,194
(e)	Building heaping weirs	No.	20
(f)	Constructing man-hole as per specification and plan	No.	11
(g)	Constructing Flushing tank of field's pattern	No.	2
(h)	Dismantling the side walls of main drain and rebuilding	C. ft.	...
(i)	Providing flow flaps as per sketch	No.	1

J. BHORE,
